VHA Homeownership Program:

7.0

The Housing Choice Voucher (HCV) Homeownership Program (HOP) allows qualified participants of the HCV Family Self-Sufficiency (FSS) Program and qualified Elderly or Disabled participants of the HCV Program the option to purchase a home and use HCV Housing Assistance Payment (HAP) towards mortgage payments and other allowable housing costs. The total number of HCV Homeownership Vouchers issued will be limited to no more than ten percent (10%) of the total number of Housing Choice Vouchers administered by the Vallejo Housing Authority. VHA has established an annual homeownership goal of 5 single-family first time homebuyers.

Two families have achieved homeownership through the FSS HCV/HOP in fiscal year 2011/2012; within the last five years the VHA/FSS program has had 67 participants in the HCV/HOP actively working towards the goal of attaining homeownership. Of the 67 FSS/HCV/HOP participants in the program 16 have successfully reached their goal of homeownership. Participants that have achieved the goal of homeownership have completed an eight hour mandatory homebuyer counseling class conducted by certified Department of Housing and Urban Development (HUD) Housing Counselors. The HUD Certified Counselors provide prepurchase and post purchase homeownership counseling classes to VHA participants, as well as assistance in their overcoming the following obstacles to homeownership: a lack of the three C's, credit, collateral and capacity. Credit, is a major indicator of a borrower's willingness, and ability to repay their debts; capacity, includes the stability and adequacy of a borrower's income; and capital, is the borrower's ability to meet the lender's liquid asset requirement to fund the required down payment, and closing costs associated with a home purchase. With the mortgage/housing crisis of 2008 historically high home prices are now reduced to more affordable levels, which potentially can, and have, provided greater opportunities for homeownership for Housing Authority participants. Additionally, in an effort to increase homeownership opportunities for HCV/HOP participants, the VHA/Housing and Community Development Division modified its Down Payment/Mortgage Assistance Program to offer income qualified households at or below 60 percent of the area median income, below market interest rate loans at 3% with deferred loan payments. The average VHA participant that has achieved homeownership has reached their goal in approximately 2 – 3 years.

VHA Project Based Voucher Program:

The Housing Authority of the City of Vallejo (VHA) has established a project-based voucher assistance program in compliance with the final rule, 24 CFR Section 983, which was effective November 14, 2005. This program is being implemented for the purpose of providing a resource of stable affordable housing units in the volatile economic market of the City of Vallejo, and to help increase participation by private owners of affordable housing. HUD regulations allow the Housing Authority to project-base up to 20 percent of its funding allocation for the HCV program under the Housing Authority's Annual Contributions Contract (ACC). In the PBV program, the rental subsidy is attached to the structure, rather than to the tenant. The HA enters into a HAP contract with an owner for not more than 25 percent (the cap) of the units in an existing housing or in a newly constructed or rehabilitated housing development. VHA currently administers 21 PBV units at Avian Glen Apartments, 301 Avian Drive.

8.	0	Capital Improvements. Please complete Parts 8.1 through 8.3, as applicable.

Large capital items must be included in the Five-Year Action Plan. Not applicable.
8.	3	Capital Fund Financing Program (CFFP). Check if the PHA proposes to use any portion of its Capital Fund Program (CFP)/Replacement Housing Factor (RHF) to repay debt incurred to finance capital improvements. Not applicable.

Housing Needs. Based on information provided by the applicable Consolidated Plan, information provided by HUD, and other generally available data, make a reasonable effort to identify the housing needs of the low-income, very low-income, and extremely low-income families who reside in the jurisdiction served by the PHA, including elderly families, families with disabilities, and households of various races and ethnic groups, and other families who are on the public housing and Section 8 tenant-based assistance waiting lists. The identification of housing needs must address issues of affordability, supply, quality, accessibility, size of units, and location.

The Housing Needs chart below rates the impact of that factor on the housing needs for each family type, from 1-5, with 1 being "no impact" and 5 being "severe impact". Housing Needs sources of data used include the Consolidated Plan, the Housing Element and Claritas, Inc.

The Housing Element for the period of 2009 – 2014 identified the following housing needs and conditions:

Housing Cost Burdened: According to the Housing Element, thirty-five percent of all households in Vallejo were overpaying for housing(The Housing Element reports that there are 36,782 Vallejo households). Households that pay between 30 and 34 percent of their income on housing are considered to be burdened by the cost of housing, while those paying more than 35 percent of the median income are considered to be severely burdened by housing costs. Approximately 4,793 extremely low-income households (14 percent of all households) were overpaying for housing cost. Of those 4,496 (13 percent) were severely cost-burdened. Approximately 3,835 very low-income households (11 percent of all households) were overpaying for housing, of which 3,071 (9 percent) were severely cost-burdened. This means that more than 80 percent of the extremely low, and very low-income renter households in Vallejo are cost burdened .

<u>Overcrowding</u>: In Vallejo 18 percent (1,303) of renter occupied units are considered overcrowded, which is defined as 1.01 - to 1.50 persons per room, and of the 18 percent, 6 percent of renter occupied units are considered severely overcrowded, which is defined as more than 1.5 occupants per room.

Special Needs Housing:

Large family households - The Housing Element Needs Assessment indicates that large family households in Vallejo would benefit from an increase in the development of larger affordable units. The Housing Element estimated that 24 percent (3,547 units) of renter-occupied units in Vallejo contained three or more bedrooms and only 7 percent (1,052 units) of renter occupied units contained four or more bedrooms, including renter-occupied single-family dwellings. Of the total households (40,075) in the City, large families represent approximately 16.8 percent. The statistical data provided gives a false sense of Vallejo having an adequate supply of units with three bedrooms or more; rather, as documented in the Needs Assessment section of the Housing Element, the majority of single-family units suitable for large families will only be affordable to households near or above the state's moderate-income limits of 81 to 120 percent of the area median income.

Elderly Households: With projected population growth for seniors, it is anticipated that approximately 609 units of affordable housing targeting the elderly and frail elderly, a subpopulation of the elderly, (aged 65 and older) will be required. With approximately 26 percent of Vallejo's elderly households being renters and approximately 17 percent earning less than 30% of the AMI, the need for affordable senior housing that promotes aging in place will be in demand. Additionally, Housing Element data, reports that the total number of elderly persons in Vallejo is 12,618, of which approximately 1,123 elderly, or 8.9 percent of the total of 12,618, are living below the Federal poverty level. In addition, the Housing Element and HUD data indicate that there are 1,501 elderly rental households, at or below 80 percent of the area median income. There are approximately 979 affordable rental units available for the elderly in Vallejo, which leaves an overall rental housing need gap among low income elderly of over 500 units. There are 915 frail elderly households in Vallejo at or below 80 percent of the area median income, and currently 806 housing units available for frail elderly in this income category, leaving a gap / deficit of 109 housing units.

*Disabled Households: Based on national estimates, seven percent of Vallejo's population age sixteen to 64 is physically disabled, i. e., has a disability that prevents them from working, has a self-care limitation, or has a mobility limitation. These people are likely to have a high need for affordable housing due to their more severe condition and reduced employment opportunities. According to the Housing Element there were 42,621 disabled persons residing in Vallejo. However, this includes persons with multiple disabilities. The actual number of disabled individuals is 22,895 persons. Planning staff has indicated that a likely explanation of the disproportionately large disabled population in Vallejo is due to the large number of board and care homes that opened in the late 1980s and 1990s. It is still anticipated that housing for disabled persons is needed to meet the ongoing needs of Vallejo's disabled population.

Physical Conditions of Housing Stock:

In 2008 there were a total of 43,840 housing units in Vallejo, with a homeownership rate of 70 percent, and renters making up 30 percent of the housing market. The growth rate in 2008 for single-family detached homes increased by 1.2 percent and decreased for multifamily developments of 2-4 units, and 5 plus units by -0.6 and -1.3 percent respectively. Similar to other cities in the region, the majority of Vallejo's housing stock is single family, accounting for 74 percent of the total housing stock in 2008. Forty-six (46%) percent of Vallejo's housing stock was built prior to 1970; the remaining fifty-four (54 %) of the housing stock was built between 1970 and 2008. Ninety percent (90%) of Vallejo's housing stock is considered sound, which is defined as well maintained and structurally sound; approximately 9 percent of the housing stock is identified as being in moderate condition, which is defined as a unit in need of replacement of one or more major components and other repairs, (e.g. roof replacement, painting, and window repairs). Approximately one percent of Vallejo homes fell into the substantial or dilapidated categories, which is defined as a unit that requires replacement of several major systems and possibly other repairs (e.g. foundation work, roof structure replacement and re-roofing, as well as painting and window replacement).
