

## Map 618 Submitter Comments

Attached you will find a district map for consideration that is from the perspective of the African American community of Vallejo. The African American community is spread out and diverse in Vallejo and our collective interest include equal and equitable access to economic development, education, housing, county services and public safety.

Each of the six Districts that we created all touch I-80 and are in close proximity to heavily populated/traveled streets and interstate highways in Vallejo such as I-37, I-29, Sonoma Blvd. Broadway St, Springs Rd and I-780.

Each of our six districts and census blocks included information about how many African American's lived in those areas in 2010, homeowners and renters, schools in the area, community centers, Faith Based Community, Hospitals, Veterans Services, County resources, Senior Population, Transit Accessibility or lack of, areas that struggle with homeless population, prostitution, access to retail businesses and neighborhoods that have similar home price values. We looked at the 2016 general election data, 2018 midterm election data as many of us worked closely on local campaigns and walked many of these proposed districts and know how many African Americans are actually in these districts. We took into consideration the proposed new City of Vallejo business and development deal how the African American community would/should be included in this. This is why some of our districts are large in the densely populated downtown areas closest to the waterfront and South Vallejo.
